SolidWorks: the center of social product interaction

What SolidWorks Users Are Saying About Vuuch

“We're pushing Vuuch as a PM tool since our company pushes PM duties onto engineers rather than dedicated PM's. With this in mind Vuuch improves communication and saves time while reducing project risk.” – Chris Sautter, Yakima

“Vuuch gets everyone on the same page and lets them communicate without leaving where they work. Vuuch creates clarity, which is especially important because project management falls onto the shoulders of everyone.” – Christine Longwell, Proterra

“Vuuch enables the team to take control of their work. It has a large impact on our projects. Vuuch keeps me organized and in touch with the team. And it's a lot of fun.” – Antoine Corbeil, Brayton Energy

Vuuch: an enterprise social system for manufacturing

- Try Vuuch today
 - Visit <http://www.vuuch.me> to register for a trial account
 - We will contact you to help design and customize your trial
- Our website: <http://www.vuuch.com>
- Our blog: <http://blog.vuuch.com>
- Remember these Vuuch basics:
 - Vuuch Pages represent items you care about
 - On a Vuuch Page, the system builds a list of tasks, *etc.* These are called Vuuch Activities
 - People can be invited to the page, to an activity, or both. You can always see who is involved in the “People” pane

Enterprise Social System for Manufacturing

Thank you!
